

P/T/RH EXPERIMENT SETUP

We have performed the experiment on Thursday, 1.10.2026 at 16:20 in BBG 1.78, sitting around the desk closer to the window. There were 5 of us sitting around the desk for the whole time of the measurement. The measurement lasted for 600 seconds.

After analysing the data with the code `'plotting_code_P_T_RH.py'` we got results, presented in Figures 1,2 and 3.

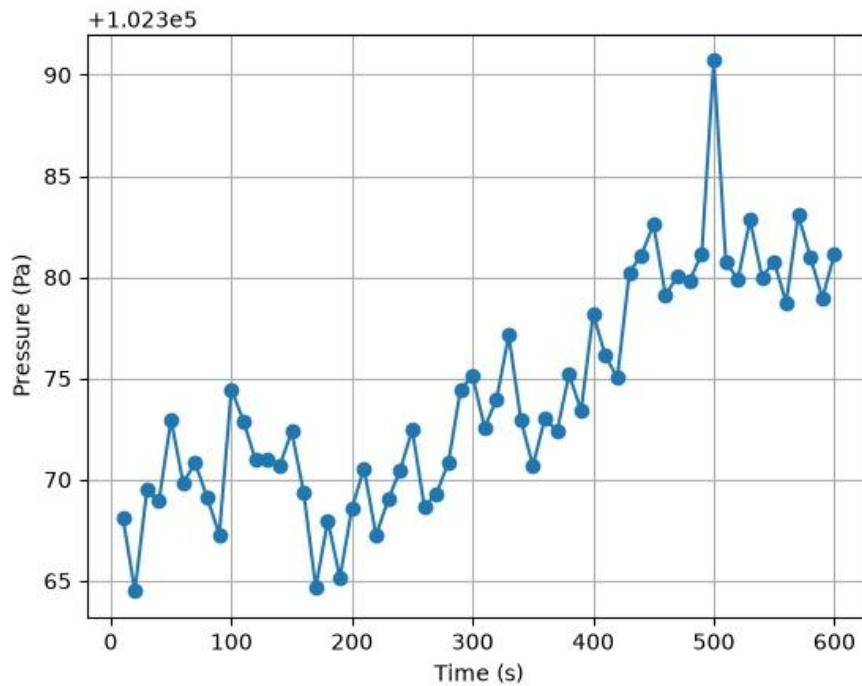

Figure 1: Pressure measurement results

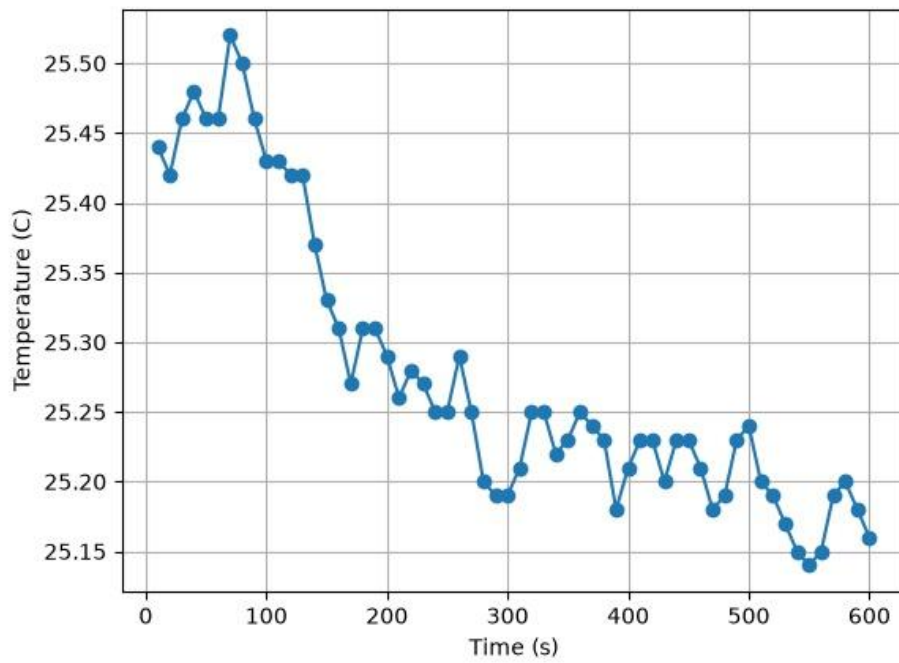

Figure 2: Temperature measurement results

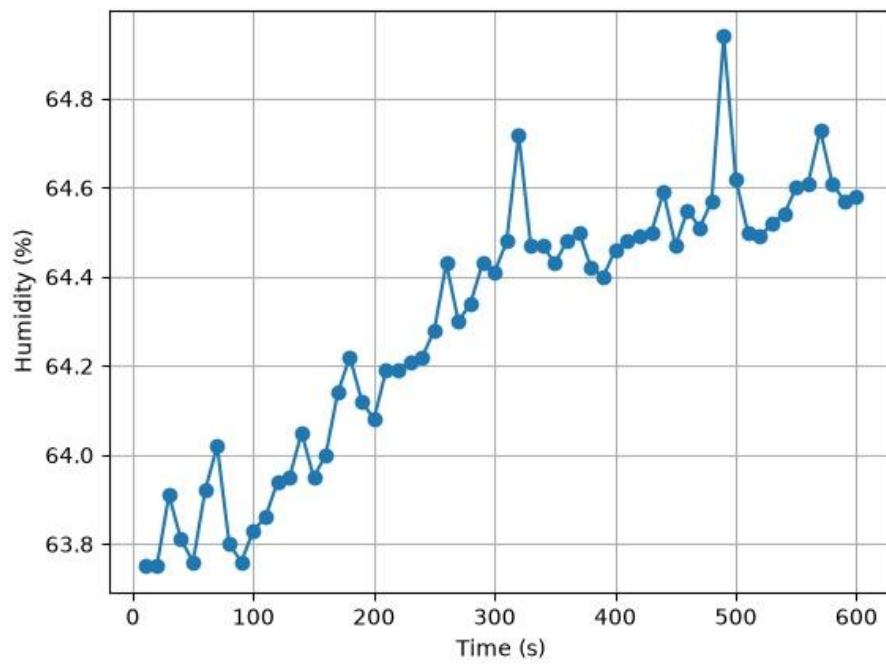

Figure 3: Humidity measurement results
